

SKA-PAK

SUPPLIED AIR RESPIRATOR

The Ska-Pak Supplied Air Respirator is a combination escape SCBA and supplied air respirator that offers emergency respiratory protection for a variety of applications, including maintenance work, hazardous materials handling, turn-arounds and confined space operations. The Ska-Pak is versatile and can be used in numerous markets, including chemical, food processing, petrochemical, oil & gas, ship building and public utilities. It is designed for use in hazardous atmospheres including those identified as immediately dangerous to life or health (IDLH)—environments with little or no oxygen, with high concentrations of contaminants or where concentrations of contaminants are unknown.

PRODUCT HIGHLIGHTS

- Combination Type C positive pressure respirator with escape cylinder for entry into or escape from a hazardous, confined space or immediately dangerous to life or health (IDLH) situations
- Includes E-Z Flo pressure demand regulator with first-breath activation and low exhalation resistance for easy breathing and reduced user fatigue
- 5-, 10-, or 15-minute rated cylinder egress options for selection versatility based on the task at hand
- Hip-mounted cylinder with a durable, secure cylinder band retention system
- Two harness styles:
 - Polypropylene - chemically resistant and lightweight
 - Kevlar - ideal in high heat environments or when there is potential for sparking

PART NUMBER:

Select a one- or two-digit number per box from the chart above that corresponds to your choice

SAR	2				0		1				1
-----	---	--	--	--	---	--	---	--	--	--	---

① Must select Entry/Egress to select an air line option.

② If you prefer an alternate facepiece style, head harness or size, choose "none" and order an approved facepiece as a separate line item.

COMBINATION AIR LINE

As a Type C positive pressure respirator, the Ska-Pak Supplied Air Respirator can be used with various lengths of Scott Safety-supplied air hose for a combination of up to 12 segments, totaling 300 feet*.

REGULATOR

The benefits of the E-Z Flo pressure demand regulator start with first-breath activation and includes its low exhalation resistance, requiring less effort to breathe and less fatigue. Doffing is made simple with the E-Z Flo air-saver switch. Depressing the air-saver switch immediately stops the air flow into the mask.

HARNES

The nylon and Kevlar harness are lightweight with adjustable shoulder and waist belts to promote easy donning and doffing. The harness includes web adjusters and quick release buckles. A strain relief location on the waist belt prevents the regulator's air hose from tugging on the regulator during operation.

CYLINDER OPTIONS

The Ska-Pak Supplied Air Respirator is available with the following rated cylinders:

- 5-minute 2216 psi aluminum
- 10-minute 4500 psi hoop-wrapped
- 15-minute 3000 psi hoop-wrapped
- 15-minute 4500 psi carbon

AIR LINE FITTINGS

Available with Hansen, Schrader, Cejn, Hansen HK plug or Hansen HK socket fittings.

FACEPIECES

The Ska-Pak Supplied Air Respirator can be used with the AV-2000, AV-3000 or AV-3000 with SureSeal facepieces, which feature the Scott Safety Top-Down Convertibility platform, allowing for one facepiece to be used in numerous respiratory protection applications, from supplied air to air purified. This one-facepiece concept reduces inventory and training costs and eliminates the need to fit-test multiple facepieces for each employee.
