

# SKA-PAK PLUS

## SUPPLIED AIR RESPIRATOR

The Ska-Pak Plus Supplied Air Respirator is a combination escape SCBA and supplied air respirator that offers emergency respiratory protection in hazardous atmospheres, including those identified as immediately dangerous to life or health (IDLH). This respirator features either a padded nylon or padded Kevlar harness for additional comfort in extended wear applications and the E-Z Klip cylinder retention mechanism for quick and easy cylinder change-out. The Ska-Pak Plus is versatile and can be used in numerous markets, including chemical, food processing, petrochemical, oil & gas, ship building and public utilities for applications like confined space entry, hazardous materials handling, general maintenance and turnarounds.

## PRODUCT HIGHLIGHTS

---

- Combination Type C positive pressure respirator with escape cylinder for entry into or escape from hazardous, confined space or immediately dangerous to life or health (IDLH) situations
- Includes E-Z Flo pressure demand regulator with first-breath activation and low exhalation resistance for easy breathing and reduced user fatigue
- 5-, 10-, or 15-minute rated cylinder egress options for selection versatility based on the job at hand
- Features the E-Z Klip cylinder retention system for quick and easy cylinder change-outs
- Three harness styles:
  - o Padded Polypropylene – chemically resistant and lightweight
  - o Padded Kevlar – ideal in high heat environments or when there is potential for sparking
  - o Integrated Full Body Harness – ideal for confined space applications

#### PART NUMBER:

Select a one- or two-digit number per box from the chart above that corresponds to your choice

SAR	3					0						1
-----	---	--	--	--	--	---	--	--	--	--	--	---

① Must select Entry/Egress to select an air line option.

② If you prefer an alternate facepiece style, head harness or size, choose "none" and order an approved facepiece as a separate line item.

③ Cases are not compatible with select FBH styles. If selecting a FBH, please choose "none" for the case option.

#### COMBINATION AIR LINE

As a Type C positive pressure respirator, the Ska-Pak Plus Supplied Air Respirator can be used with various lengths of Scott Safety-supplied air hose for a combination of up to 12 segments, totaling 300 feet\*.

#### REGULATOR

The benefits of the E-Z Flo pressure demand regulator start with first-breath activation and its low exhalation resistance means less effort to breathe and less fatigue. Doffing is made simple with the E-Z Flo air-saver switch. Depressing the air-saver switch immediately stops the air flow into the mask.

#### HARNESS

The nylon and Kevlar harness are lightweight with padded adjustable shoulder straps for maximum comfort. The harness includes web adjusters and quick release buckles. A strain relief location on the waist belt prevents the regulator's air hose from tugging on the regulator during operation. An integrated full-body harness is also available, ideal for confined space applications.

#### CYLINDER OPTIONS

The Ska-Pak Plus Supplied Air Respirator is available with the following rated cylinders, featuring the E-Z Klip cylinder retention system:

- 5-minute 2216 psi aluminum
- 5-minute 3000 psi carbon
- 10-minute 3000 psi carbon
- 10-minute 4500 psi hoop-wrapped
- 15-minute 3000 psi hoop-wrapped
- 15-minute 4500 psi carbon

#### AIR LINE FITTINGS

Available with Hansen, Schrader, Cejn, Hansen HK plug or Hansen HK socket fittings.

#### FACEPIECES

The Ska-Pak Plus Supplied Air Respirator can be used with the AV-2000, AV-3000 or AV-3000 with SureSeal facepieces, which feature the Scott Safety Top-Down Convertibility platform, allowing for one facepiece to be used in numerous respiratory protection applications, from supplied air to air purified. This one-facepiece concept reduces inventory and training costs and eliminates the need to fit-test multiple facepieces for each employee.
